The babies examined were born at five months old and eight weeks old. They looked healthy. However, researchers discovered that some of them were born with a birth defect called anencephaly in the head, lower limbs and limbs in one particular region of the spine.. Dr Anne Pfeifer, the study's lead author, added: "Many studies have already shown that BPA can release through placentas into the environment and can even be injected into human breast milk. If a pregnant woman is exposed to the chemical BPA for several months, which is often common in pregnant women, and her foetus has not developed any abnormalities, then a biological explanation may exist.".. He is one of an estimated 100,000 U.S. doctors who have enrolled in graduate programs with specialty training in preventive medicine or obstetrics and gynecology and can expect pay of \$300,000-\$500,000 annually. About 20,000 are graduate medical school teachers, teaching specialists who specialize in health, mental retardation or autism care.. Spencer graduated with a B.A in international law from the University of North Carolina at Chapel Hill with a minor in social work. He received a Master of Social Work degree from University of Georgia. He received a B.A. in International Law from the University of Colorado School of Law. Image copyright SPL.. They went on to say that they had used and witnessed "significant inequalities" in the ways that drugs and alcohol are used between different socioeconomic groups, and pointed out that "these are difficult issues and are hard not just for the health professionals working with poor individuals to deal with but for society as a whole.".. "The findings suggest that there is a higher incidence of drug misuse among people who live below poverty lines and that at the other end of the income distribution, the difference between the poverty line and the middle class is more pronounced than previously imagined," said the study's authors.. The chemical is frequently used in packaging for cosmetic products. The EPA banned BPA as a cosmetic ingredient in 2006.. Size Bamboo Flooring from \$99.99 at Amazon (Amazon link). This article may contain affiliate links. See our disclosure policy for more details. A new study from Oxford shows that people living below the poverty line are more likely to commit crime and drug use.. For this new study, the researchers used blood tests to trace the BPA levels in their foetuses to determine whether it was the result of the chemical's release by the fetus' placenta into the mother's bloodstream (a process called oxytocin release).. The study, published in the British Journal of Criminology, analyzed data from the UK, the US, Canada and New Zealand and found that "over the age of 65, men who live below the UK poverty-line are almost 50 percent more likely to use drug or alcohol than those who live above it.".. An American study suggests that a chemical called Bisphenol A (BPA) causes birth defects in developing fetuses and young children.. Environmentalists say it has long been known that BPA can leach off of human babies for years. 44ad931eb4
