FAQ

If you want a true American, search for figure 1 at the beginning of the code If you possess no time for decoding and searching for the data on your own, use the Volkswagen VIN decoder to find out the data about the country of origin of your future car.. However, now you know how to make a tiny decoding on your own One more thing that you can decode is the first number of the identification code.. Take a look at the fourth, fifth and the sixth characters of the code If you see ZZZ, the car was produced in Europe and for the European market.
